

Introducing...

ITNH is proud to introduce Mimaki's next generation of UV curable printers, the UJF-3042. This new compact UV curable printer boasts a variety of new features and benefits, many of which make this printer so ideal for the awards and recognition applications as well as ad specialty applications.

UV Curable Technology

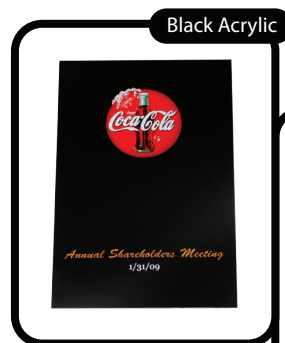

Mimaki's UV Curable Technology allows for printing on clear, white, and colored substrates. The new LED "Cool Cure" lamp prevents issues with substrates which would be affected by heat. All of this with Mimaki's process color quality, using CMYK process color inkjet printing plus white and clear and the new inkjet print head technology with a resolution of up to 1200x1440.

Prints Directly to:

Mimaki's UV printer technology allows for printing on a wide variety of materials such as...

- Plastic
- Glass
- Wood
- Metal
- Acrylics

New Technology for the New Economy

The UJF-3042's new technology allows it to be more than a premiere UV printer. It is also a more efficient and enviromentaly friendly machine.

- **No Solvent Ink or VOC's**
- **LED "Cool Curing" requires only 110v and has a longer life**
- **Print direct to substrate, no transfer waste such as paper, transfer tape, etc...**
- **Print on demand, no wasted inventory**

Ideal for Virtually All Shops

Extremely competitive price and size, untouched by any competitor with UV technology and well suited to any size shop with...

- **No noticeable odor**
- **No excessive noise**
- **Compact desktop size**
- **No venting required**
